this is the website for Bootstrap, one of the most popular open-source front-end frameworks used for developing responsive and mobile-first websites and web applications. Maintained by the team at Twitter, Bootstrap provides developers with a powerful collection of HTML, CSS, and JavaScript components that make web development faster, easier, and more consistent. The website offers extensive documentation, examples, and customization options that help both beginners and experienced developers build user-friendly interfaces without starting from scratch. It includes ready-to-use design templates for typography, forms, buttons, navigation, modals, and more, which follow modern design best practices and ensure cross-browser compatibility.

The site also supports advanced features like utility APIs, Sass variables, a powerful grid system, and JavaScript plugins. Moreover, it keeps evolving with regular updates—Bootstrap 5, for example, dropped jQuery in favor of pure JavaScript, improved responsiveness, and introduced utility-first features. Whether you are building a personal portfolio, a company dashboard, or a commercial web app, getbootstrap.com serves as a comprehensive, reliable, and easy-to-navigate resource to support your front-end development journey.

Bootstrap

Designed and built with all the love in the world by the Bootstrap team with the help of our contributors.
Code licensed MIT, docs CC BY 3.0.
Currently v5.3.7.
